Senior Web Developer with 10 years of experience in back end development and developing user interfaces, testing, debugging, and training staff. Well-versed in numerous programming languages including **PHP, Lavarel, HTML5, JavaScript, CSS, MySQL**. Strong background in **project management and customer relations**.

**INTERESTS** : Reading books, music, Gym, Chess

## WORK EXPERIENCE

**LIFEPLUS CO.LTD**

*JUNE 2015 - PRESENT*

### TECHNICAL LEADER

- Developing and expanding the whole stack of product software suite.
- Analyzing user requirements and converting them into design documents
- Developing high-quality software design and architecture
- Typical projects (Life +, G-life, KBV member, ...)

#### 1. LIFE PLUS AND G-LIFE CLUB: Membership services System.

Analyzing Design of Database model, user flow and data migration.

- ❖ Understanding, clarifying and documenting software requirements
- ❖ Drawing product wire frame, functional workflow
- ❖ Describe and analyze business processes, propose process improvement solutions
- ❖ Analyzing requirements, thereby design business processes into systems, creating basic and detailed design tables.
- ❖ Research and share customers' professional knowledge with the project team
- ❖ Support other related departments in carrying out works related to the project's procedures.

#### 2. KBV Member: Membership services System of KBV Vietnam.

- ❖ Be involved in our product development, maintenance, and support of our own products, which consists of web and mobile applications.
- ❖ Develop back end using PHP, Laravel
- ❖ Work closely with our external/internal team in areas of design requirements, coding, testing, and deployments.
- ❖ Suggest and give feedback within the team to improve performance and product

**DEVELOPER**

- Be responsible for the user flows of features from wire framing to PRD
- Research and specify new features and enhancements to existing features. Document the requirements via well defined specifications and review with the team and defined specifications
- Collect, analyze and report on data and make adjustments - to product features & development plans - as needed to facilitate a successful new product rollout.
- Work with Product Managers for the product roadmap & execute the product development flow
- Collaborate with developers to implement the features (provide PRD, present the user flow to developers to ensure the same understanding, Q&A during the development)
- Collaborate with UIUX designers for the discovery and design phase of a feature
- Create, monitor, and evaluate the impact of experiments using a combination of analytical tools & research methods

**CERTIFICATIONS**

- Certificate of proficiency information system management
- Higher diploma in software Engineering
- Diploma information system management

**EDUCATION**

**APTECH** ( OCT 2003 - MAY 2006 )  
Major: APTECH  
PROGRAMMER GPA: **79/100**
